

About S-CAPE and caresyntax[®]

caresyntax[®] enables OR teams to predict and improve surgical performance.

The caresyntax[®] platform converges IoT technology and healthcare data analytics to achieve key global and procedural insights. Hospitals can benchmark outcomes and improve surgical workflows, paving the way to decreased variability of cost and clinical performance. Automated real-time reporting drives training and quality improvement, allowing the hospital to save money and mitigate risk - all without the time and investment required when using big data analytics.

Our technologies have raised the performance bar in more than 6,000 operating rooms worldwide, and are supporting the next generation of data-enabled OR teams in over 10 million procedures per year. Headquartered in Berlin and Boston, with over 90 employees from 20 different nationalities, we seek highly-motivated and passionate individuals to join us.

Application Engineer (m/f) audio/video and media technology for our Berlin office

Your responsibilities:

- work out technical solutions in the audio/video, media and IT technology
- analyse complex customer requirements and determine possible implementations in terms of components and interfaces
- work independently on complex tasks and technical documentation
- support our internal sales team and project managers, providing bill of material, block diagrams, cable planning on project base
- work with product managers and purchasing, evaluating new components and suppliers in regards to technical specifications, cost and availability
- produce part-list, wiring schemes, assembly and test instructions for production and deployment of the solutions
- you will propose improvement in terms of technology and processes for potential savings in cost and increased quality standards

Your qualifications:

- ideally, a state-certified technician for communication and information technology, a master's certificate in information technology or a bachelor examination with an emphasis in media and communication engineering or electrical engineering; or a comparable qualification
- practical work experience in media technology with a good knowledge of professional audio/video and IT solutions as well as standard products in the market.
- ideally, experience with the design, implementation and commissioning of video conferencing and presentation systems
- understanding of test and measuring equipment and procedures in audio/video and IT area
- good knowledge of MS Office and Visio, Auto-CAD (or comparable) is a plus
- spoken and written fluency in German and English is required

Why work for us? - We offer

- an international and innovative environment
- a warm-hearted, flexible, and solution-oriented culture
- room to introduce and implement creative ideas and develop your talents
- professional and intellectual exchange with highly-talented and ambitious colleagues from all over the world

- self-organisation and agile methods encouraged
- work visa sponsorship and relocation assistance provided, where applicable.

If this sounds appealing to you and you feel this could be the right match both job and culture wise then we would be glad to receive your compelling application. Please send your documents stating your salary expectations as well as your earliest possible starting date by e-mail to:
