

About S-CAPE and caresyntax[®]

caresyntax[®] enables OR teams to predict and improve surgical performance.

The caresyntax[®] platform converges IoT technology and healthcare data analytics to achieve key global and procedural insights. Hospitals can benchmark outcomes and improve surgical workflows, paving the way to decreased variability of cost and clinical performance. Automated real-time reporting drives training and quality improvement, allowing the hospital to save money and mitigate risk - all without the time and investment required when using big data analytics.

Our technologies have raised the performance bar in more than 6,000 operating rooms worldwide, and are supporting the next generation of data-enabled OR teams in over 10 million procedures per year. Headquartered in Berlin and Boston, with over 90 employees from 20 different nationalities, we seek highly-motivated and passionate individuals to join us.

Project Manager (m/f) Installation, Test and Commissioning in Berlin - Tempelhof Audio / Video and IT Integration in Hospital environment

Your responsibilities:

- Plan, manage and control all installation, test and commissioning activities in the OR integration projects assigned to you in Europe or other countries
- Ensure that all project deliverables are performed on time and in accordance to contractual obligations as indicated in direct offers and public tenders
- Work on technical clearance and documentation during the whole project cycle
- Provide technical contribution and strategies in the bid process
- Lead the technician team during the deployment phase and support after sales
- Act as main point of contact for external technical departments (hospital IT, construction, service and integration partners)
- Prepare reports to management board for budget and revenue execution

Your qualifications:

- Technical studies or education e.g. Electrical, Electronic, Informatics or Industrial Engineering
- Competence in one or more areas of image acquisition devices, audio-video technology, IT and unified communication systems
- Knowledge of medical device standards and regulation is a plus
- At least 2-3 years work-related experience in project management for installation, test and Commissioning preferable in hospital environment or similar construction building
- Understanding of computer network and information systems in hospitals
- Willingness for a large amount of national and international travels (40-60%)
- Outstanding customer and service orientation
- Strong communication and negotiation skills
- Proficiency in German. Fluency in English both spoken and written (min. B2)

Why work for us? - We offer

- an international and innovative environment
- a warm-hearted, flexible, and solution-oriented culture
- room to introduce and implement creative ideas and develop your talents
- professional and intellectual exchange with highly-talented and ambitious colleagues from all over the world

- self-organisation and agile methods encouraged
- work visa sponsorship and relocation assistance provided, where applicable

If this sounds appealing to you and you feel this could be the right match both job and culture wise then we would be glad to receive your compelling application. Please send your documents stating your salary expectations as well as your earliest possible starting date by e-mail to:
